LETTER FROM THE PRESIDENT

As a company that deals with agricultural products and a global supply chain, concerns for the environment, sustainability and governance factor into every facet of our business, and every decision we make.

From strategizing with farmers to protect agricultural lands, to promoting sustainable practices, implementing carbon avoidance strategies and ensuring a safe healthy workplace for all, our mission is to constantly improve and evolve the way we do business.

To learn more about these activities, our ESG report details of all our programs and certifications that we have in place as part of our overall corporate practices.

Thank you, Good Tea Good Life

Gerry Vandergrift
