

“Guided by internationally recognized sustainability governance and reporting programs, including the Ethical Tea Partnership, Rainforest Alliance, Fairtrade International, and Certified Organic, we're committed to continuous improvement in our tea sourcing activities. All of our tea suppliers are required to adhere to Mother Parkers' Supplier Code of Ethics to ensure social and economic best practices are upheld.

We work to continuously advance our Corporate Sustainability initiatives in support of climate action plans and to make positive impacts on the communities in which we operate. Through our partnership with One Tree Planted, we are committed to planting one million trees in coffee and tea producing countries by 2025, including 100,000 trees in each of India, Kenya, and Indonesia. This will help to combat climate change, reduce carbon emissions, restore forests, protect biodiversity and support tea-growing communities.”
